PROJECTS

POS SYSTEM - POINT OF SALE (POS) SYSTEM | JAVA (NETBEANS), SWING, MYSQL

Desktop-based POS application built with Java (NetBeans) and MySQL.

- Developed a role-based system (Admin/Employee) supporting inventory management, price updates, receipt generation, and automated stock synchronization with transaction history tracking via MySQL database integration.

PRICEPECTIVE - SALES ANALYTICS & DEMAND FORECASTING WEB APP

Full-stack web application that allows users to upload CSV sales data, map columns, and generate automated business insights and demand forecasts per product/category.

- Built a React + Vite frontend and Django REST API backend to handle CSV ingestion, validation, data processing, and interactive analytics dashboards.
- Implemented a forecasting pipeline using Prophet with automated data cleaning, column detection, and dataset-aware configuration to improve forecast accuracy and reliability.
- Optimized performance by persisting summarized analytics results in a relational database for fast history retrieval without reprocessing raw uploads.

TECHNICAL SKILLS

Web technologies: HTML (Advanced), CSS (Intermediate)

Programming languages: C (Intermediate), Python (Intermediate), Java (Advanced), Javascript (Intermediate)

Databases: MySQL (Intermediate)

Embedded Systems: Arduino (Intermediate)

Electronics: Circuit prototyping, sensors, motor drivers (Basic-Intermediate)

Dev tools: Dev-C++, Netbeans, Visual Studio Code, Git, Arduino IDE

EXTRACURRICULAR EXPERIENCE

- CSS Olympics:**
- Java Programming Competition 1st place. A contest where students from different OLFU branches showcase their ability to solve programming problems using Java.
 - Also participated in Quiz Bee, and Networking competitions.

EDUCATION

Bachelor of Science in Computer Science

Our Lady of Fatima University - Laguna Campus - Expected 2026

Relevant Coursework: Data Structures, Database Systems, Software Engineering, Web Development
